Learn JavaScript: Next Steps

You've completed the Learn JavaScript course! What's next?

Congratulations, you've successfully completed the Learn JavaScript course! You got an introduction to programming fundamentals using the latest JavaScript syntax. More specifically, you learned to:

- implement JavaScript data types, built-in methods, and variables
- use conditionals to control the flow of a program in JavaScript
- construct functions and pass data through them
- identify global and block-level scopes in JavaScript
- use arrays to store lists of data
- use loops to execute blocks of code multiple times
- use iterator methods to simplify the process of looping over arrays
- use JavaScript ES6 object syntax to model real-world items

Your learning journey into JavaScript isn't over yet! There are plenty of other topics that you can dive into to continue learning. Here are our recommendations for next steps:

Learn Intermediate JavaScript
